

the **TES**
Roundtable debate

A Green Generation?

- Does sustainability education at primary and secondary schools get enough support in the classroom and beyond?
- Is there enough sustainability education currently in schools?
- What does best practice in sustainability education look like?
- What are the major opportunities and barriers to bringing sustainability education to schools?
- What support do teachers need to make sustainability education happen?

Join the green debate – for the response from our panel of experts and educators to these questions make sure you make a date to read next week's TES.
